licht.forum informs readers about current issues and trends in domestic, commercial and industrial lighting – from lighting for the home garden to energy-efficient lighting solutions for local authorities. The compact periodical is published at irregular intervals and distributed directly to interested target groups.

The print media *licht.wissen* and *licht.forum* can simply be ordered on the Internet at www.licht.de or downloaded as PDF documents.

Your “knowledge store”: www.licht.de

More than 5,000 pages about light and lighting

www.licht.de puts the world of lighting at your fingertips. It is a major lighting portal offering a wealth of information as well as design tools and tips for professionals, journalists and web users interested in lighting. Six sections provide swift and easy access to the information you are looking for.

“**Lighting for the home**” presents lots of lighting examples and provides useful planning advice for domestic lighting.

“**Lighting for professionals**” provides information about good lighting for company premises and public facilities, offers checklists for fitters, identifies important standards and publicises industry events.

“**Lighting know-how**” explains the basic language of lighting and the components of modern lighting technology.

“**Info and service**” offers an extensive lighting glossary, brochures for direct download, links to sites of further interest – and informative web specials on topical issues.

What are light stela – and who supplies them? Answers to questions like that are found in the “**Products and manufacturers**” section, where searches can be conducted either by category or by keyword. Links take you directly to manufacturers’ catalogues and data sheets, saving you the trouble of trawling through different websites.

Journalists find what they need for their work in the “**Press**” section: impartial press releases and a well-stocked image bank.
