

E27 base

E14 base

E14 base

R7s base

G9 base

E27 base
 ≥ 100 W

Examples of non-clear lamps: in the top row (from left to right) a frosted incandescent lamp with E27 screw base and two frosted candle-shaped incandescent lamps with E14 base, in the bottom row (from left to right) a frosted halogen lamp with R7s base and a frosted halogen lamp without reflector with G9 base. The bottom row also shows, on the right, a 100 W clear incandescent lamp with E27 base. These lamps stand for the group of lamps that may no longer be put into circulation as of 1 September 2009: non-clear incandescent and halogen lamps as well as clear incandescent and halogen lamps with a power rating of 100 W or more. From that date onwards, the only non-clear lamps allowed will be those with an Energy Efficiency Class A rating – e.g. energy-saving lamps. (Image: licht.de)
